

FlexGlow LED Lighting is flexible and waterproof making it perfect for fitting into narrow, damp locations that regular tube lighting cannot. The FlexGlow application is used for refrigeration, accent lighting, outdoors, and more.

Aluminum brackets make mounting easy to snap the tubing into place and it's complete. With two options to choose from, the 3-sided series & the T series, FlexGlow offers a variety of lighting to fit your specific needs.

Three-Sided Series

PRODUCT DETAILS

Intended Use

FlexGlow LED lights are ideal for both indoor and outdoor applications. Can be used in wet and damp locations. IP67 Rated.

Construction & Materials

Tubing is anti-yellowing, heat resistant, chemical resistant silicone. Mounting brackets are aluminum clips.

Optical System

3-sided series contains 3 LED's per section at 17.75mm per section. T-series contains 3 LED's per section at 24.5mm per section.

Electrical System

12Volt- DC

Installation

Sturdy, aluminum mounting brackets screw into your desired location. FlexGlow tubing then snaps easily into the brackets.
