

CV DC LED High Bay Fixture

The constant voltage (CV) DC LED High Bay Fixture delivers efficient, high-output illumination for warehouses, data centers, production areas, and other high-ceiling commercial and industrial spaces. Its DC-powered design supports modern facility infrastructure while providing dependable overhead lighting for large-scale applications.

PRODUCT DETAILS

Intended Use

Designed for new construction, facility upgrades, and retrofit applications where high bay lighting is powered through centralized DC power distribution infrastructure.

Construction & Materials

High-quality cast aluminum housing supplies durability and supports thermal management. Shatter-resistant polycarbonate lens provides added protection in commercial and industrial applications.

Electrical System

Operates from a constant voltage (CV) power source with output voltage within the fixture's 24–60 VDC input range. The fixture has a 90W maximum power rating, designed for a Class 2 or LPS supply.

Part Number	Color Temperature	Lumens	Efficacy
726-50600-1	5000K	15,000	170 lm/W
